

Detention Without Physical Examination (DWPE)

When your product is detained at the border, time is of the essence for your perishables products.

We understand the urgency to provide the evidence required for your products to be released by the FDA. Our microbiologists and chemists are available around the clock to help you through this process, managing packet uploads directly to the FDA*. We treat every client and sample as a priority. Our mission is to expedite the process for importers with detained perishables.

*Packets upload in 3-5 days or as long as 5-7 days

With the FSVP Rule, the FDA designed a new food safety role for food importers. Our partners at Azulle CORE Support services alleviate the added pressure of fulfilling that role, saving you time, cost, effort, and uncertainty.
